Notes:

The AV2HDMI WIISTAR WS-Z51 Module comes with a USB Power and a standard S-Video Cable. An Atari specific AV cable will be needed.

The 8.8 x 8.8 x 5 mm heat sink is for IC U1 on the AV2HDMI module.

[The Brewing Academy](#) will be selling fully assembled boards, cases, and a bare board kit that brings the 4-layer PCB, NS405 chip and 48-pin socket.

The 28 pin IC sockets have a center support bar that needs to be cut out with a pair of diagonal wire cutters in order to see the silk screened IC p/n on the PCB.

Substitution: 74HCTxxx can be used in place of 74HCxxx ICs, any 5% ¼ watt resistor with the same ohm value can be swapped from any vendor or manufacturer.
